

Version 2.0 · 12 November 2026 · https://sostcore.com/brand/

What changed in 2.0: the official primary logo of SOST is now the **rainbow Sigma** (Σ inside a multicolour energy ring). wSOST uses the same ring with **wΣ**. The former red-eye emblems are **Legacy / Superseded**: they remain in the kit for reference only and must not be presented as the current logo.

1. Identity

	SOST	wSOST
Name	SOST	Wrapped SOST
Ticker / symbol	SOST	wSOST (intended)
Nature	Native coin of the SOST proof-of-work blockchain (8 decimals)	Planned ERC-20 representation of SOST on Ethereum (18 decimals)
Official logo	**SOST Official Primary Logo**: luminous **Σ** in a rainbow energy ring	Luminous **wΣ** in the same rainbow energy ring
Status	Live mainnet since genesis	**In development, not deployed.** No official wSOST token or contract address exists.

Intended relationship: **1 wSOST = 1 native SOST**, through a two-way bridge that locks SOST on the SOST chain and releases wSOST from a fixed, immobilised reserve on Ethereum. The bridge is subject to validation (independent audit, a SOST network upgrade and an explicit launch decision) and is **not operational**. Any token presented today as wSOST is not issued by SOST.

2. The logos

The two logos are the official artwork supplied by the SOST project. Nothing has been redrawn or regenerated: every file is the original image, placed on a square canvas centred on the ring and resampled in high quality. Outside the ring the files are fully transparent.

- `sost/original/`, `wsost/original/`: the original artwork, byte-identical to the file supplied by the project (1254 × 1254 px).
- `sost/png/`, `wsost/png/`: 2048 / 1024 / 512 / 256 / 128 / 64 / 32 px, each **transparent** and on **black**. The 2048 px file is enlarged from the 1254 px original.
- `exchange/`: square, transparent token icons, 1024 / 512 / 256 / 200 / 128 / 64 / 32 px, for exchange listings, wallets and token lists.

- `sost/favicon/` : favicon.ico (16 / 32 / 48), favicon PNGs, Apple touch icon, Android / PWA icons including maskable versions (logo inside the 80 % safe zone).
- `sost/social/` : Open Graph / social card, 1200 × 630.
- `legacy/eye/` : the former red-eye emblems. **Superseded. Do not use as the current logo.**

Vector (SVG). No SVG is provided. The logos are luminous, photographic illustrations (light ribbons, glow, reflections); tracing them into vector paths would visibly change the artwork. The PNG files are the canonical versions.

3. Colours

Measured on the official logo (median of the saturated pixels of each colour band) and on sostcore.com.

Role	Hex	Use
SOST Red	`#FB010D`	Primary brand colour (sostcore.com)
Black	`#000000`	Standard background
Ring interior	`#0B0B11`	Dark field inside the ring
Sigma core	`#FDFBE6`	Luminous Σ / wΣ core
Sigma glow	`#F09503`	Warm glow around Σ / wΣ
Ring red	`#F51611`	Ring and ribbons
Ring orange	`#F68602`	Ring and ribbons
Ring yellow	`#FCCE07`	Ring and ribbons
Ring green	`#32EE74`	Ring and ribbons
Ring cyan	`#03D5FB`	Ring and ribbons
Ring blue	`#0183EB`	Ring and ribbons
Ring violet	`#9F16EF`	Ring and ribbons
Ring magenta	`#EB27E2`	Ring and ribbons
Spectrum	`#8B5CF6 → #E879F9 → #3B82F6 → #22D3EE → #A3E635 → #FACC15 → #FB923C`	Multicolour accent line used on sostcore.com

Typefaces used on sostcore.com: Space Grotesk (headings), Inter (text), IBM Plex Mono (data).

4. Usage rules

- **Proportions.** Always scale uniformly. The logo is a circle and must stay a circle.
- **Clear space.** Keep free space around the ring equal to at least 10 % of its diameter.
- **Backgrounds.** Black or very dark backgrounds are preferred, as on sostcore.com. On light or coloured backgrounds use the transparent files.
- **Minimum size.** 24 px on screen (32 px or more recommended; the Σ stays legible at 32 px). In print, 10 mm minimum.
- **Name next to the logo.** Write SOST and wSOST exactly like this (lower-case w for wSOST).

5. Not allowed

- Stretching, skewing, rotating, cropping the ring or changing its proportions.
- Recolouring, adding filters, outlines, shadows or effects.
- Replacing, moving or redrawing the Σ or wΣ symbol, or using the SOST logo for wSOST and vice versa.
- Recreating the logo with AI tools or vector tracing and presenting it as official.
- Using the legacy red-eye emblem as the current SOST or wSOST logo.
- Presenting wSOST as live, listed or tradable, or showing a wSOST contract address, before an official announcement on sostcore.com.
- Combining the marks with retired elements: gold-backing or gold-reserve guarantees, Gold Vault, XAUT, Gold Access Key.
- Suggesting endorsement, partnership or investment returns that SOST has not announced.

6. Contact

Brand and listing requests: through the contact options on https://sostcore.com.
